			to Customer: 21. Estimated Cost:			•		
6A N/A					None - Under 100	one - Under 100K		
22. Source Reference: NCR (attach) Action Item Tech Ref. GSFC Other:								
23. Problem: (use additional Sheets if necessary)  Have the Data Management department post the initial baseline data model technical paper for 6A to the EDHS Internal Server.  Under the document posting website for Science Users' community, developers from Landover and the DAACs constituents access this information for references to data model. In addition, send out hard copies to the stipulated individuals referenced on the next page. Lastly, send a cc:mail message to DM indicating the technical paper has been posted and to close the CCR as completed.  24. Proposed Solution: (use additional sheets if necessary)								
Post the softcopy of this document to the Science Users' Community Bulletin Board, Release 6A Developers bulletin board, and e-mail a softcopy to the DAACs constituents. This is considered of course a more time consuming approach, which should not be considered unless it is for workaround purposes only.								
25. Alternate Solution: (use additional sheets if necessary) There are no alternate solutions available to this process for updating the 420 Data Model that has been approved for the project.								
26. Consequences if Change(s) are not approved: (use additional sheets if necessary)  If the changes are not posted to the website for key personnel to access mentioned on the next page then there is a possibility for issues to arise as to whether or not the initial 6A Data Model baseline has been posted.								
27. Justification for Emergency (If Block 15 is "Emergency"): N/A
